PERSONAL PROJECTS

HiveMind (School App) (10/2018 - 07/2021)
- Hivemind is a Django Restful API created with the purpose of simplifying Club Membership Management. I was working with members of the club to finalize the project which we finally handed over to the incoming team to perform testing and implement later on.

Parking Perroquet (06/2019 - 07/2021)
- It is a parking project meant to provide its service as "Platform as a Service" to its clients after the creation of the account by allocating you a parking space from the designated slots available across the city through GPS. It also offers online checkout means as payment options.
